

# Do Any of These Sound Familiar?

- How much time is wasted making multiple trips to supply houses each week? Each day?
- Is it too time consuming for your employees to pull material from your warehouse?
- Is your warehouse as organized as it should be? Labeled?
- How much gas is used on supplier runs during the week? How many trucks?
- Could you add in additional service calls with better truck stock?
- Are you stocking enough of the right material?
- Would you benefit from labeled material – on your truck, in your warehouse?

BINMAX IS THE ANSWER TO ALL OF THESE QUESTIONS.

## Prepare for Inventory Fulfillment with:

# BINMAX

Inventory Replenishment Solutions

## Scan, Order, Repeat.

Cut the time you spend preparing reorders of jobsite materials with customized inventory replenishment solutions from Ferguson. Whether you store your equipment in a large warehouse, in a stockroom or on your truck, we will help you find the best solutions to streamline your reorder process. Discover how our knowledgeable associates can work with you one-on-one at your location to help you select, combine and implement a complete inventory replenishment system from our full range of inventory replenishment solutions listed below.

### SKU Mobile App

Use our mobile app to scan material you need to reorder and upload to your account on Ferguson.com – you can even use your own codes!

### Printed Labels with Custom Codes

Your sales associate can provide you with printed labels using your custom codes for each product in your inventory.

### Custom Catalogs

Made specifically for the material that you want to stock, a custom catalog provides the convenience of reordering for your company.

**Let us help you put a BinMax solution in place to organize and reorder the material you need!**
